

Bro. Greg Sneed has served for Iota for 13 years. His mission is to serve Iota and his community through **I**nvestment, **O**ppportunity, **T**ransformation, and **A**ction. As an educator, leader, and musician, Bro. Sneed has reached many minds and collaborated with other professionals to implement substantial and transformational change. As an educator, his work in both Newark and East Orange, NJ restructured and implemented brand new musical ensembles and institutional organizations that previously did not exist and now remain as permanent entities in several schools. Additionally, his service as a disciplinarian/life skills teacher continues to improve students' character and approach to everyday challenges and circumstances. He is currently completing his Masters' degree in Educational Administration at Montclair State University where he looks to be a building administrator leading institutions to fulfill their full potential.

Bro. Sneed has always answered the call of Iota through serving as an officer every year in various capacities since his initiation. From Chapter Polaris to Regional Polaris his leadership oversaw the initiation of over 350 bros and over 300 graduates from both undergraduate and alumni institutions. His leadership helped maintain the highest number of graduates fraternity wide for 5 consecutive years. Under his administration, the Atlantic Coast Region restructured its meetings, initiating professional job preparation seminars, partnering with other non-profit organizations in various industries, creating dialogue and action plans for improvement, and the implementation of cutting edge methods of operation. He has received back to back Bro of the Year Awards in the Atlantic Coast Region (2007,2008), received state accolades in New Jersey, and has built working relationships with other organizations in several different industries.

Bro. Sneed sees leadership as his calling. He feels it is his responsibility to give better opportunities to others as was given to him by leaders who came before him. It is his philosophy that leadership on any level evokes **humility rather than self-status and service rather than seeking power**. As Grand Vice-Polaris he will work to ensure that his brothers are given the tools and guidance necessary to compete in an ever-changing world. His love and commitment to Iota is one that is deep and personal for without Iota, he would not be the man he is today. It is his passion to give brothers the chance to say the same.
